Establishing medical oxygen need	
Please share any additional feedback.	<ul style="list-style-type: none"> . I dearly benefited from the workshop. . Ras . I thought the entire construct was well thought out and well executed. It brought to life many of the issues around building the right medical oxygen infrastructure. . There could have been more emphasis on the importance of having medical oxygen in all healthcare facility settings, especially if they treat critical patients and neonatal care, rather than focusing on pandemic periods. Most participants spoke more about pandemic preparedness and readiness in terms of medical oxygen, MO should be made an essential part of designing a health facility and a requirement for qualification of hospitals. Perhaps WHO should develop a regulatory framework to classify health care services coverage/ or facilities including MO availability as a major criteria based on the level of care provided. . RAS . Well clarified on the presentation!
Identifying the need-gap	
Please share any additional feedback.	<ul style="list-style-type: none"> . RAS . By creating an "imaginary" world it decoupled the challenges from any one nation or local situation. Hopefully people can take the abstraction and apply it to their particular set of challenges. . Na . RAS . I collected all the relevant Resources, thanks for it!
